DETAILED ACTION

***Previous Election/Restrictions is withdrawn. This is new ground of Election/Restrictions***

***Election/Restrictions.***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

**Group I, claim(s) 1-16, drawn to A read-only recording medium, classified in Class 428/ subclass 800.**

**Group II, claim(s) 17-19 and 20-30, Claims 17-19 drawn to Method of optically reading information recorded on the read-only recorded medium, classified in Class 396/subclass 275; claims 20-30 drawn to : Method for forming a read-only recording medium. Class 430/138.**

**a) Species I, e.g. claims 17- 19: Method of optically reading information recorded on the read-only recorded medium, classified in Class 396/subclass 275.**

**b) Species II, e.g. claims 20-30: Method for forming a read-only recording medium. Class 430/138.**

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of following can be shown: (1) that the process as

Art Unit: 2818

claimed can be use to make other and materially different product or by hand, or (2) that process as claimed can be made by another and materially different process. (MPEP § 806.05(f)). In the instance case unpatentabilities of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by the processes materially different from those of the group II invention, for example, in the claim 25, the product as claimed can be made by another and materially different process such as a mask layer of metal oxide layer of Read-only medium is formed through the use a medium melting point method instead of a high melting point.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-extensive. Therefore, separate examination would be required and restriction for examination purposes as indicated is proper.

If Applicants elect Group II, Applicants are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, no claim is generic. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument

that a claim is all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the selection, applicant must indicate which are readable upon the elected species. M.P.E.P. 809.02(a). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
